

Special Announcement Cleaning of Granite Memorials

The staff at Cathedral, All Saints and Gate of Heaven Cemeteries announces a new service for our families , the deaning of granite memorials and monuments.

Over time granite memorials become dirty and unsightly because of normal aging and environmental factors such as pollution. The top two photos show memorials before the cleaning process and the bottom two photos show these same memorials after they have been cleaned. The professional staff at our cemeteries can safely clean your existing memorial at a reasonable cost. After receiving a request for this service, a trained staff member evaluates the memorial or monument to be sure it is in sound condition and can be properly cleaned. After the evaluation the family is given the cost and can decide whether to move forward. For more information please call the cemetery office.
